

OFFOR Health, Inc. is on a mission to increase access to care for thousands of patients throughout the country. Founded by three board-certified anesthesiologists, we designed our adult and pediatric office-based anesthesia services to function as a true operating room. Because of this, we have the same high standards of patient safety and quality of care as a hospital or ambulatory center.

Our services are unique because we provide a full care team, which adds an additional layer of comfort, safety, and support for patients and staff. Our care team consists of an anesthesiologist, a registered nurse, and an anesthesia coordinator. We provide you with all of the necessary equipment, medications, and staffing to feel as if you are in a hospital or ASC.

Our care team and administrative support team also allows you to focus fully on patient care while we handle all billing, insurance verification, scheduling, malpractice insurance, and equipment ordering, maintenance, transport, and setup.

We have full-time, part-time, and PRN opportunities available. Surgery days are available Monday through Saturday. There are no evening shifts and you will never be on-call. A typical surgery day starts at 7 a.m. and ends at 3 p.m. We provide you with the flexibility to create your own surgery schedule and choose the work-life balance that fits your lifestyle.
